BETHESDA, Md. - Picking a new appliance can be confusing. Now there's a new way to sort through the brands and find out which one is the right one for you. And for now, the technology is only available to consumers in the DC area.

When you go to the store this seems to help you cut right to the chase to save money and buy a product that's more energy efficient and therefore better for the environment.

There was no way to tell how much a product would cost you to run until now.

Savenia Labs is rating the most frequently used appliances toasters, microwaves, coffeemakers, humidifiers. The company is hoping to expand the ratings system in the future to all things that use a plug.
