SAVENIA LABS NAMED MARYLAND INCUBATOR COMPANY OF THE YEAR

WINNER - 2013 Best Environmental / Energy Company Honors

(Bethesda, MD Issued June 18, 2013) - Savenia Labs was awarded Maryland Incubator Company of the Year in the Best Environmental / Energy Company category, a prize that acknowledges Maryland's best performers from the state's extensive network of business incubators. Founded in the Bethesda Green incubator, Savenia Labs has revolutionized shopping with innovative energy ratings outlining appliance lifetime energy costs and environmental impacts.

"The 2013 Incubator Company of the Year winners represent the most outstanding group of startups in the State," said Rob Rosenbaum, president and executive director of TEDCO. "Having provided entrepreneurial support to many of the honored companies, TEDCO is proud to see their continued success. We congratulate this year's winners and look forward to watching them grow."

"We accept this award with great appreciation for the support we have received from the local community" said John Jabara, founder of Savenia Labs. "We have many more developments in store to fulfill our mission of transforming the way people think about choosing products".

Recognized for its revolutionary Energy Rating Labels, Savenia Labs has truly changed the way people shop for appliances and electricals in the region. By presenting easy-to-compare data on like products, shoppers can make better-informed purchasing decisions before they buy about the products they use every day. A family that uses Savenia Labs Energy Ratings can save thousands of dollars in electricity costs over the lifetimes of the products they purchase. As reductions in appliance energy use also reduce air pollution, saving energy can both save money and do a good deed for the environment.

Finalists were recognized at the Maryland Incubator Company of the Year Awards, held at the American Visionary Art Museum in Baltimore. Maryland Technology Development Corporation (TEDCO), McGladrey, and Saul Ewing LLP founded the Maryland Incubator Company of the Year Awards to bring together leaders in the business, technology and investment communities and showcase innovative companies across the state. Since the first Maryland incubator was founded in 1986, the incubator program has helped turn many Maryland small businesses into industry leaders.

About Savenia Labs

Savenia Labs is an independent testing laboratory that provides energy and environmental impact ratings on popular appliances and electricals. Savenia Labs produces information labels and ratings so individuals and businesses can choose energy saving and environmentally friendly alternatives while shopping.
