SAVENIA UNVEILS AWARD-WINNING SOLAR VALUE CALCULATOR

'CARFAX FOR SOLAR' - SAVENIA RATINGS HELP SOLAR HOME SELLERS DIFFERENTIATE, SELL FASTER, CAPTURE MORE VALUE

(Bethesda, MD Issued October 10, 2015) - [Savenia Labs](#), an award winning provider of energy and environmental impact ratings today announced that its solar value calculator is now online and available in both free and Premium 'Verified' versions to solar home sellers, solar installers, Realtors and home or solar system buyers at www.saveniahome.com. Savenia rates solar homes in all 50 states from web, mobile and tablet devices. Premium customers receive independent, 3rd party 'Verified' Savenia Solar Rating labels and tailored marketing materials to be used at open houses, showings and online advertising to help differentiate a solar home, sell faster and capture more value.

Savenia Solar Ratings were developed to provide answers for the 70% of US solar homeowners that have up to now been excluded from existing valuation tools that ignore the full monetary benefits of leased solar systems and owned solar systems with incentive income (SRECs). Based on years of proprietary research and collaborations with the Department of Energy SunShot Catalyst program and the National Renewable Energy Laboratories, Savenia Solar Ratings calculate the value of solar systems, regardless of how they were financed, and illuminate a growing market that has been operating with little hard data.

"There has been so much innovation in the purchasing of residential solar systems, we want to bring that same excitement to the buyers of these solar homes," said John Jabara, Founder of Savenia Labs. "Savenia Ratings make a solar home more compelling for home buyers - and we think shining a light on the previously hidden value of efficiency features represents the future of home shopping."

Savenia Solar Ratings are the first to value all solar systems, regardless of how they were financed. This includes leases, pre-paid leases, PPA's (Power Purchase Agreements), owned systems with or without incentive income (SRECs) and loans that convey during sale. Savenia Premium 'Verified' Ratings come with a valuation guarantee that offers money back if system valuations are low.

Savenia Solar Ratings provide an independent, 3rd party view on value from a home-buyers perspective. Buyers trust independent information to make decisions on important purchases, and Savenia has won numerous awards from state, federal and non-profit organizations that align well with our mission in the provision of unbiased, reliable information.

The Savenia 'Verified' Rating analyzes system value over a 25 year lifetime; tailored to specific system features including lease rates, contract terms and conditions, warranties, buy-out clauses, electricity price increase rates, dynamic SREC income, and other important aspects. The Savenia Premium 'Verified Rating' package comes with Savenia's independent, 3rd party Solar Rating Labels, reports and marketing materials that can be used to promote the value of a solar home.

Pricing and Availability

The Savenia Free Solar Value Calculator and Premium 'Verified' Solar Ratings are available starting today. Savenia Premium 'Verified' ratings cost \$275 for an existing system (>1 year old) and \$345 for a new system (<1 year old, includes a bonus rating after 12 months of operation).

Referral partners can get discounts and incentives by introducing solar home clients to Savenia. Partners can request a Savenia referral kit at <http://saveniahome.com/channel-partner/>.

About Savenia

Savenia helps Realtors, homeowners, builders and renovators unlock the value of home efficiency upgrades. Savenia provides home sellers with customized Home Rating Labels, marketing materials and online marketing to sell faster, provide higher client service and capture the full value of homes for sale.
