

SAVENIA, LLC

LIFETIME ENERGY USE, ENERGY COST AND  
CARBON EMISSIONS FOR RESIDENTIAL USE OF  
SELECTED APPLIANCES

## INDEPENDENT ACCOUNTANT'S REPORT

John Jabara  
Founder  
Savenia, LLC  
4825 Cordell Avenue Suite 201  
Bethesda, Maryland 20814

We have examined Savenia, LLC's (the Company) methodology and computations in computing the accompanying Schedules of the Company's determination of the Lifetime Energy Use, Energy Cost and Carbon Emissions for residential use of selected models of appliances in the categories of 10-12 cup drip coffee makers, 6 slice toaster ovens and mid size countertop microwave ovens. The Lifetime Energy Cost and Carbon Emissions data presented in the accompanying Schedules is specific to users of these appliances in the 20814 zip code. The Lifetime Energy Use data presented in the accompanying Schedules is not zip code specific. The Company's determination of the lifetime energy use, energy cost and carbon emissions for these appliances is based upon the results of test data received from an independent third party, the results of test data provided by the Company, and energy cost estimates obtained from the United States Department of Energy applied to a user profile created by the Company. The Company is responsible for its methodology and ratings calculations. The Company has represented that it is independent from the manufacturers of the products included for testing in this report. Our responsibility is to express an opinion based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the Lifetime Energy Use, Energy Cost and Carbon Emissions methodologies and computations and performing such other procedures as we considered necessary in the circumstances, including verification that the methodology was applied consistently to each appliance in the selected appliance category. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, the Lifetime Energy Use, Energy Cost and Carbon Emissions data referred to above presents fairly, in all material respects, the Lifetime Energy Use, Energy Cost and Carbon Emissions for residential use of selected models of appliances in the categories of 10-12 cup drip coffee makers, 6 slice toaster ovens and mid size countertop microwave ovens, as reflected in the accompanying Schedules. The Lifetime Energy Cost and Carbon Emissions

data presented in the accompanying Schedules is specific to residential users of these appliances in the 20814 zip code. The Lifetime Energy Use data presented in the accompanying Schedules is not zip code specific.
